

## BAB V

### KESIMPULAN DAN SARAN

#### 5.1 Kesimpulan

Berdasarkan hasil pembahasan yang telah penulis jabarkan pada halaman sebelumnya, maka penulis dapat menarik kesimpulan bahwa:

1. Aplikasi Pembelajaran berbasis android dengan nama *MINLearn* ini berhasil dibangun dan dapat digunakan sebagai sarana pembelajaran untuk anak-anak.
2. Aplikasi *MINLearn* berhasil dipasang di *smartphone* dan dipergunakan oleh siswa-siswi di MIN Kefamenanu.
3. Memiliki tampilan *interface* yang *user friendly* sehingga membuat siswa-siswi mudah menggunakan aplikasi *MINLearn*.

#### 5.2 Saran

Berikut ini adalah beberapa saran yang penulis sampaikan yang dapat dijadikan pertimbangan untuk sistem selanjutnya sebagai berikut:

1. Kedepannya agar aplikasi dapat dikembangkan sehingga dapat berjalan di sistem operasi lain.
2. Diharapkan pada pengembangan selanjutnya akan ada penambahan fitur seperti monitoring akun oleh orang tua.
3. Perlu ditambahkan *history* penilaian untuk setiap anak yang sudah mengerjakan quiz.

Nomor : 25 / UN60.1.10. /EP/2022  
Lampiran : Satu Setds  
Perihal : Mohon Izin Penelitian  
Yth.  
Kepala Sekolah Madrasah Ibtidaiyah Negeri Kefamenanu  
Di-  
Tempat

Bersama Surat ini kami menyampaikan bahwa salah satu syarat penyelesaian tugas akhir Mahasiswa Strata Satu (S1) di Fakultas Pertanian Unimor adalah Penelitian. Berkaitan dengan itu, kami mohon kiranya Bapak dapat memberikan ijin kepada Mahasiswa kami:

Nama : Nurliah Apriyanti  
NPM : 51180089  
Prodi : Teknologi Informasi

Untuk melaksanakan penelitian dengan Judul “ Multimedia Pembelajaran Pengenalan Perangkat Keras Bagi Siswa Sekolah Dasar Menggunakan Aplikasi Minilearn”. Waktu disesuaikan dilapangan.

Demikian surat permohonan ini kami sampaikan. Atas perhatian dan kerja sama kami ucapkan terima kasih.

Mengetahui,  
Ketua Program Studi Teknologi Informasi  
  
Darsono Nababan, S. Kom, M. Kom  
NIP: 198502222019031008

Tembusan:  
1. Wakil Dekan 1 Fakultas Pertanian;  
2. Ketua Program Studi Teknologi Informasi Faperta Universitas Timor

## Screen Admin Edit Quiz

The code is organized into several functional blocks:

- Initialization:** A large 'in' block sets up text boxes (tb\_pertanyaan, tb\_jawaban1-4) by selecting list items from a 'data' list. It also initializes four checkboxes (Checkbox1-4) to 'true' based on comparisons between list items. A global key 'global kunci\_jawaban' is set to the item at index 7.
- Screen Management:** Three 'when Screen\_Admin\_EditQuiz' events:
  - Initialize:** Sets 'Show Title Bar Back Button' to true and calls 'set\_data'.
  - Title Bar Back Button Clicked:** Closes the screen with 'result' set to false.
  - Back Pressed:** Closes the screen with 'result' set to false.
- Checkbox Click Events:** Four 'when Checkbox Click' events. Each event checks if the checkbox is checked and, if so, sets the 'global kunci\_jawaban' to the corresponding text box value (tb\_jawaban1-4).
- Message Handling:** A 'call Notifier1 Show Message Dialog' block. The message is checked for 'http' or 'https://\*\*'. If found, it displays an error message with the error number.
- Checkbox State Management:** A 'when any Checkbox.Changed' block that iterates through all checkboxes. If any checkbox is checked, it sets all checkboxes to 'true'.

## Screen Lihat Materi

The image displays six distinct code blocks for a Flutter application screen named 'Screen Lihat Materi'. Each block is a 'when' event with a 'do' action block.

- Block 1:** 'when Screen\_Lihat\_Materi Initialize'. The 'do' block contains: 'set Screen\_Lihat\_Materi Show Title Bar Back Button to true', 'set Screen\_Lihat\_Materi Title to select list item list get start value index 1', and 'call Web\_Viewer1 Go To URL url select list item list get start value index 2'.
- Block 2:** 'when Screen\_Lihat\_Materi Title Bar Back Button Clicked'. The 'do' block contains: 'close screen'.
- Block 3:** 'when Screen\_Lihat\_Materi Back Pressed'. The 'do' block contains: 'close screen'.
- Block 4:** 'when Web\_Viewer1 Progress Changed'. The 'do' block contains: 'progress' (input), 'set Web\_Viewer1 Visible to false', 'set layout\_progress Visible to true', 'set Label1 Text to join "Loading ..." get progress', 'if get progress == 100', 'then set Web\_Viewer1 Visible to true', 'set layout\_progress Visible to false'.
- Block 5:** 'when Web\_Viewer1 Page Loaded'. The 'do' block contains: 'url' (input), 'if compare texts get url != select list item list get start value index 2', 'then call Web\_Viewer1 Go To URL url select list item list get start value index 2'.
- Block 6:** 'when btn\_reload Click'. The 'do' block contains: 'call Web\_Viewer1 Go To URL url select list item list get start value index 2'.
